

Expander Wheel Installation Help

ARE YOU EXPERIENCING DIFFICULTY INSTALLING YOUR EXPANDER WHEEL?

FPD has developed a brief video to explain the installation process and posted it to Facebook and YouTube. The steps involved to properly install your FootPro™ Expander Wheel are covered from beginning to end in this video. Many farriers have installed the expander wheel in their trucks and shops because of the efficient grinding and fast speed the units provide. For product details and specifications visit farrierproducts.com. Information is available on all of the grinding equipment available through the FPD dealer network.

FPD 20 for 2020 Facebook Giveaway

FPD'S FACEBOOK GIVEAWAY ITEM FOR MAY IS THE BELLOTA MINI RASP

- Exclusive Bellota sharpening technology
- Perfect solution when you have to hold a rasp with one hand
- Uniform tooth geometry
- Integral heat treatment
- Special Bellota chrome alloy steel
- 13" Length - Ideal for small hooves
- Plastic handle attached
- File side has an intermediate cut for excellent and efficient finish
- Rasp side is very aggressive (6 teeth/row) for quick removal of hoof material in all working conditions

Follow FPD on Facebook @farrierproductdistribution to see what we're offering in the current month and look for posts like this one to register for a chance to win the monthly free giveaway. This giveaway is only valid in the U.S. and Canada.

JUST A REMINDER

Razer Flap Pads Now Available

These pads are a single density pad designed to be applied with a partial shoe. The back section of the pad makes contact with the ground and provides cushion for the heel area of the hoof. Packed in 5 pairs to a box.

Kerckhaert Steel Comfort

The Steel Comfort meets the demands of farriers looking for a high quality shoe that aids in breakover. Key design features include rolled toe and branches, better breakover that improves coordination of movement and optimized balance with less pressure on the tendons. Built-in sole relief. Punched for Liberty 5 Combo or E-4 Slim. Fronts side clipped sizes 00, 0, 1, 2, 3, 4.

Find dealers carrying these product on FPD's Dealer Locator at www.farrierproducts.com/locations.

Farrier Events

FPD is still not making any plans for farrier events and travel at least through June 2020. Under the circumstances, we don't believe the events and group gatherings are a necessity and certainly don't want to encourage anyone to put themselves or others at risk. Stay Safe!

Vettec Equine Products a Mainstay in the Farrier Market

By Larkin Greene

TWENTY-TWO YEARS AGO, VETTEC INTRODUCED ADVANCED URETHANE ADHESIVES TO THE EQUINE MARKET AIMED AT RESTORING COMPROMISED HOOF STRUCTURE AS WELL AS PROTECTING AND SUPPORTING THE FOOT.

With materials specifically designed for equine applications, farriers can quickly and reliably put foot back on a horse, and protect soles and frogs without the need for a physical pad.

Polyurethanes are well suited to equine applications because they are durable, withstand stress, strain and impact. Urethanes are non-flammable, produce almost no vapor, and do not chemically attack the hoof wall.

Pour-in pads became popular for four reasons: protection, support, vibration dampening, and quick, easy application. As a durable, yet flexible protective layer, a horse in challenging terrain can step on the sharpest rock without even knowing it. Full fills provide horses more physical surface area to stand on, and more surface area for distributing weight, helping to ease the load on the perimeter hoof wall. More recently, pour-in pad materials have been used to customize hoof boots.

Adhere and Superfast offer many ways to restore the foot itself. Aside from repairs that are capable of holding nails and clinches, these materials are great for gluing on steel, aluminum and synthetic shoes, or for building a custom shoe directly on the foot in a matter of a few minutes. The superior bond and speed of Superfast means foal extensions can be customized, layered and altered throughout the treatment phase.

MORE VALUE FOR YOUR MONEY.

30% MORE.

The new **210cc** Vettec cartridge features a leak-free design, holds 30% more material and is easier to open and dispense. **Bigger. Better. Lower Price.**
